

LAW ENFORCEMENT DRIVER TRAINING

Instructor Development Workshop

INSTRUCTOR DEVELOPMENT WORKSHOP

Students succeed because of the instructor's ability to diagnose problems and prescribe solutions, as well as, motivate, support, and give feedback.

When we developed this workshop, we loaded it with practical tools and information. We selected powerful instruction techniques from the best of the best, only the ones that really work.

Throughout the day, we'll keep it lively with plenty of in-class exercises — all included in a workbook for long-term reference. Attendees will leave this workshop with a comprehensive understanding of the materials and will be able to use them "back home."

Whether attendees are current instructors or planning to instruct, this workshop saves years of trial-and-error experience. "Old-hands" learn new ideas and techniques for energizing students. All learn to dig deeper and uncover the secrets that grab student attention.

This workshop is about how to instruct. It teaches high-performance communication skills, provides diagnostic tools and develops student-specific improvement strategies. It is not a lecture on performance driving techniques, their application or principles.

CHOOSE A RECOGNIZED LEADER

- ▼ Why "Real Time" Instruction Is So Difficult...
- ▼ New Student Management Skills...
- ▼ Integrated Competency Based Improvement Strategies...
- ▼ Diagnostic Tools That Analyze Student Performance...
- ▼ Pertinent Coaching Skills That Grab Student Attention....

Finally...

A Law Enforcement Driver Instructors Workshop.

"I took away many practical techniques that I can apply tomorrow."

Learn to Communicate Clear Expectations and Give Meaningful Feedback.

"A very logical and comprehensive instructional process that improves driver performance."

Driving high performance

***In the cockpit
In the classroom
In your company***

Real-time classrooms are complicated places to maintain student focus, teach judgment and improve skill-sets.

In this workshop instructors learn to coach students in their learning style using assessment profiles which predetermine student specific improvement opportunities.
